Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-7 in the reply filed on 4/7/2004 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 – 2, 5 - 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Stumborg et al..

Stumborg et al., U.S. Patent no. 6720654 discloses a semiconductor apparatus comprising, as shown in Figure 8, an underlayer formed on a substrate 46 of silicon. A first insulating layer 48 is formed on the substrate and has a concave portion. The concave portion is filled with a conductor comprising a barrier layer of barium 47 located at the bottom surface of the concave portion. The barrier 49 is also located along sidewalls of the concave portion. A first metal portion 45 is formed on the barrier layer and fills the concave portion. The metal portion 45 is described as copper in column 12, line 35, but column 13, line 29 describes how other metals including Cu-Al alloys can be used. The metals listed include just Cu, Cu-Al, Cu-Si-Al, and "copper doped with a dopant (e.g. aluminum) ".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 - 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Stumborg et al..

Stumborg et al. do not disclose a second insulating layer with a second concave portion and a second conductive portion including a second barrier film, however this is merely the duplication of parts in the Stumborg et al. structure and would have been obvious to one of ordinary skill in the art at the time the invention was made.
